Re: Community Development, Public Relations, Marketing Strategies
Children, Education, Safety, Protection, Law Enforcement

Dear Executives,

A new era of potential in child protection tools for law enforcement has dawned upon us. We are writing to you because we would like your company to have the integrity to launch this worldwide initiative within a long term relationship.

There are many known disturbing statistics from the Department of Justice concerning the ongoing and never ending battlefield surrounding all communities globally. One of these statistics is that of offenders denying our children's and grandchildren's rights of passage and many other rights into adulthood. These denials come in the form of physical actions against children directly and their education on a daily basis that communities must battle. We are talking about the silent and rarely spoken actions of rape, murder, seduction and molestations of children by **"registered" sex offenders that have been released back out onto our streets to strike yet again.**

Our Government does a superior job of arming our military to battle their fights. However, when it comes to taking action and hearing the calls of our grieving parents and destroyed families on local levels, it takes years to enact laws and to filter them through the procurement systems as tools for our law enforcement officers to get results. By the time the laws change 5-10 years have passed and the illegal activities of offenders for whom these laws were made for in the first place have modified to circumvent those laws. It is time for the gloves to come off.

We at The Childhood Shield Foundation have compiled specialized tracking protection "methodologies" for our nation's probation departments that are capable of confronting these turbulent obstacles and predators in real-time. These tracking service methods can be done independently from any Government procurement filtering system, donated to probation departments or be performed on their own as well.

Ambertrax is the name of this program which targets trackable registered offenders, school grounds and school buses. The routes of these children and buses to and from schools that are taken are the homeland battlefields in which our children are preyed upon who are simply trying to get an education. We have been trying to explain to the US Department of Education, elected political officials and state departments of education that it is the inherent duties for these schools to do everything in their power to protect their assets (students), our children and to work with us by endorsing the Ambertrax program for these turnkey solutions.

Powerful corporate giants like yourself are now needed in order to change public opinion within politics to the seriousness of these issues. Ambertrax needs to become a title amendment to a law or for an executive order to be enacted into the Department of Justice to prevent such atrocities in the future.

It is time for Congress to pass this into a title amendment for a reauthorized bill such as No Child Left Behind or The Adam Walsh Child Safety and Protection Act 2006 or to step aside and allow the public to assist their local probation departments whose budgets are already strained.

As of today, there are 300,000,000+ people that need to hear what Ambertrax is all about. We believe that your company can aid us to bring that message to them given its high level of family ideals that are instilled within. It is our aim to educate the world on how it is possible to proactively protect our children in "real-time."

We are asking for a commitment from your company to raise the bar on its corporate social responsibility to its communities which in turn will continue to give back time and time again into your positive public image. Please help us to help those who cannot help themselves and to prevent the loss or suffering of yet another child due to the law breakers that are being put back into our society. Think about the children/grandchildren that are around you and in your family. They terribly need our help, your help. You hold the power in your hands to make a difference, to save many lives, children's / grandchildren's lives.

If you are able to envision your company's marketing strategies and plans to embrace these needs for the world's communities, please let us know so we may begin to formulate preemptive plans.

Keep in mind also that the tracking methods will be instituted from computer servers hosted inside one dozen RV's (2010 Renegade Ikons 45' long with large advertising panel spaces) Mobile Command Centers across the country on the roads like billboards. They are quite an eye catcher for all to see and all the while they do actively protect children 24/7.

Respectfully,

Awaiting your reply,

M . A . N .
